Through their empowerment, women gain greater share of control over resources and it gives them the power of decision making in the home, community, society and nation. I am extremely proud of being a woman.

Holistic education, all round development and multidimensional thinking are the hallmarks of our education system as we strongly believe that education should enable and explore the powers of human mind and spirit. We believe in providing our students an environment, rich in knowledge and supportive for their co-curricular and extra-curricular interests.
